

# STACK OVERFLOW DEVELOPER SURVEY 2019 ANALYSIS

JENEL LUISE BOLOSAN  
JUNE 20, 2023

# OUTLINE

---

- Executive Summary
- Introduction
- Methodology
- Results
  - Visualization – Charts
  - Dashboard
- Discussion
  - Findings & Implications
- Conclusion
- Appendix

# EXECUTIVE SUMMARY

---

- The most used programming languages, databases, platforms and web frames changes as the IT world continues to grow.
- Knowing the on demand technology is vital as more technologies emerge this modern day.
- There is still a gap in the gender aspect of IT professionals.

# INTRODUCTION

---

- The world of IT continues to grow as more technologies are being developed to suit the needs of clientele.
- It is important as IT professionals to keep track of the current trend of technologies to ensure one has the right skillset.
- This presentation was made to know the most used technologies and what will be the next in demand technologies to encourage and help people know what they need.
- This presentation also shows the respondent demographics with regards to age, gender, location and education level.

# METHODOLOGY

---

- A subset of 2019 Stack Overflow Developer Survey Results was used to know the current and future trends of technologies IT professionals use.
- The dataset used was wrangled to make it ready for analysis.
- After analyzing the cleaned dataset, different visualizations were made to be presented.
- Dashboard was created to identify key insights for data driven decisions.

# RESULTS

---

# PROGRAMMING LANGUAGE TRENDS

## Current Year

Top 10 Language Worked With

## Next Year

Top 10 Desired Languages To Learn Next Year

# PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- JavaScript is the most used programming language and is currently what IT professionals will still use in 2020

## Implications

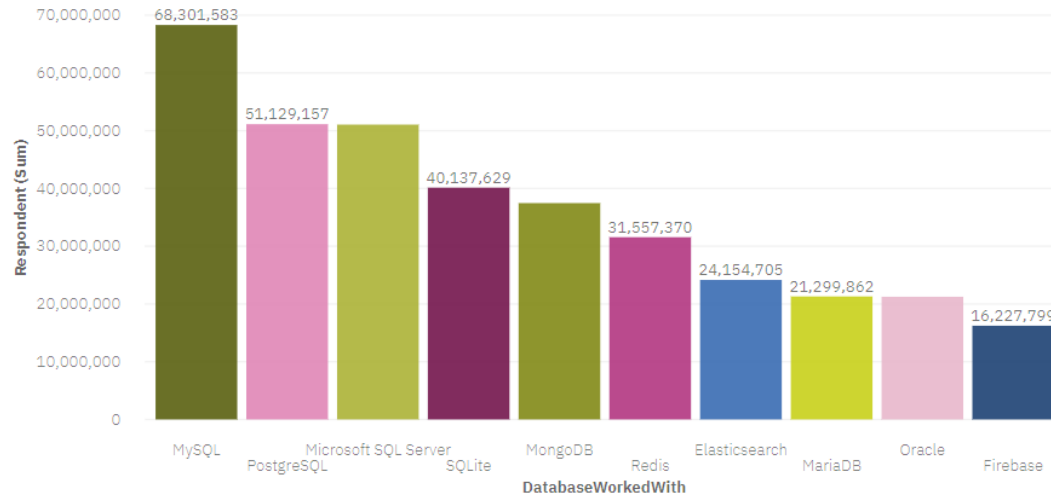

- Web Development languages (JavaScript, HTML/CSS) are still on trend by 2020 though Python has a big potential to dominate the other programming languages in the next years.

# DATABASE TRENDS

## Current Year

Top 10 Databases Worked With

## Next Year

Top 10 Desired Databases To Learn Next Year

# DATABASE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- MySQL is the most used database in 2019.
- PostgreSQL will be the database IT professionals would like to learn for 2020

## Implications

- IT professionals prefer the flexibility and functionality of object-relational databases like PostgreSQL
- While PostgreSQL is more likely to be used in 2020, MongoDB takes second place due to the fact that it is faster compared to other relational database. It is easier to access and more scalable.

# DASHBOARD

---

This is a link to a dashboard built for IT professional to see the current technology usage, the future technology trends and the demographics of respondents who answered the survey.

# DISCUSSION

---

- There are a lot of young professionals practicing IT especially 20s and 30s in age.
- There is a huge gap between men and women who practice IT.

# OVERALL FINDINGS & IMPLICATIONS

---

## Findings

- JavaScript is the most commonly used programming language with Python coming in next.
- Easy-to-use databases such as PostgreSQL and MongoDB are on trend and will be used in the next few years.
- While there are many new emerging platforms, Linux and Windows are still the more widely used.
- There are many young IT professionals ranging from 20 years old to 30 years old.
- Mostly, the IT world is dominated by male professionals.

## Implications

- JavaScript is still needed but learning Python in the next few years will help IT professionals be on demand with the changing times.
- Proficiency in other languages, databases, platforms and web frames make IT professionals more likely to be hired due to their flexibility to handle more than one skill.

# CONCLUSION

---

- To be in demand, IT professionals need to learn more than one programming language, web frame, database or platform as new technologies emerge.
- Easy to learn programming languages and more flexible databases will be the trend for the next coming years.
- Men are more inclined to technology compare to women.
